

VETERANS AND PARTNERS VIDEO SERIES

Towards the end of 2024 and into 2025, Ferrexpo launched a video series “Veterans and Veteran Wives”, dedicated to sharing the personal stories and insights of Ukrainian veterans and their partners.

It is important to record these for two reasons: so that we can share and learn from each other today, and to ensure future generations will also have access to our experiences, in the hope that this will preserve a true and full picture of events and contribute to a more peaceful future.

A video featuring each of the veterans and their partners is released near the same time, so that viewers can see their unique stories from twin perspectives.
